

METHOD OF TREATMENT OF INFLUENZA

ABSTRACT

5 The present invention discloses a method of treating a subject diagnosed or suspected of having an influenza virus infection. The method includes administering to the subject a pharmaceutical effective amount of 2-amino-8-(β -D-ribofuranosyl)imidazo[1,2-a]-s-triazin-4-one or a pharmaceutically acceptable salt of 2-amino-8-(β -D-ribofuranosyl)imidazo[1,2-a]-s-triazin-4-one. This method can also be used prophylactically for subjects who may be exposed to influenza virus.
